Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Small Area and Administrative Data Division

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9723) or to the Statistics Canada reference centre in:

St. John's (772-4073)	Sturgeon Falls (753-4888)
Halifax (426-5331)	Winnipeg (949-4020)
Montréal (283-5725)	Regina (359-5405)
Ottawa (990-8116)	Edmonton (420-3027)
Toronto (973-6586)	Vancouver (666-3691)

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres.

Des données sous plusieurs formes...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Division des données régionales et administratives

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9723) ou au centre de consultation de Statistique Canada à:

St. John's (772-4073)	Sturgeon Falls (753-4888)
Halifax (426-5331)	Winnipeg (949-4020)

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

... figures not appropriate or not applicable.

x confidential to meet secrecy requirements of the Statistics Act.

0 indicates a percentage of less than half of one percent.

This publication was prepared under the direction of John Leyes, Director, Small Area and Administrative Data Division, with major contributions by Debra Armstrong, Édouard Auger, Denis Bétournay, Sue Biscope, Marty Clattenburg, Chantal Cousineau, Diane Dubé, Liz Fitzgerald, Dominique Niaison, Liette Paquette, Linda Standish and Michele Vigder.

SIGNES CONVENTIONNELLS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

... n'ayant pas lieu de figurer.

x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

0 indique un pourcentage de moins de la moitié d'un pourcent.

Cette publication a été rédigée sous la direction de John Leyes, directeur de la Division des données régionales et administratives, avec le concours appréciable de Debra Armstrong, Édouard Auger, Denis Bétournay, Sue Biscope, Marty Clattenburg, Chantal Cousineau, Diane Dubé, Liz Fitzgerald, Dominique Niaison, Liette Paquette, Linda Standish and Michele Vigder.

INTRODUCTION

Data Source

The data in this publication are derived from income tax data for 1985. Tax returns for 1985 were, for the most part, filed in the spring of 1986, and the mailing address at the time of filing is the basis for the geographic information in the tables. Demographic characteristics such as age and marital status are given for December 31, 1985. Income information is for calendar year 1985.

Geography

The following data are presented by Forward Sortation Area (FSA) in urban areas and for individual postal codes in rural areas. The FSA is the first three characters of the postal code (e.g. T5A). Within each FSA there are many individual postal codes. These postal codes can be classified by the type (i.e. mode) of mail delivery involved. In large urban areas, mail can be delivered in a number of ways:

- to a specific residential address;
- to a specific business address;
- to a rural route on the fringe of the urban area;
- to a locked box near a new subdivision (suburban service);
- to a locked box at a post office;
- to general delivery at a post office.

Tabulations for FSAs appear in two forms: FSA-1 and/or FSA-2. Tabulations for each FSA-1 (e.g. T5A-1) include data corresponding to postal codes representing **residential** addresses. All persons using business addresses, post office boxes or general delivery have been grouped into FSA-2 (e.g. T5A-2).

Source des données

Les données tirées des déclarations de revenus des particuliers pour l'année 1985 sont à la base des tableaux contenus dans cette publication. La ventilation géographique est obtenue à partir de l'adresse de retour inscrite sur les déclarations, celles-ci ayant été complétées, en majorité, au printemps de l'année 1986. Les indicateurs démographiques tels que l'âge et l'état matrimonial sont en date du 31 décembre 1985. Les données sur le revenu correspondent aux revenus déclarés pour l'année 1985.

Géographie

La ventilation géographique des régions urbaines se situe au niveau des régions de tri d'acheminement (RTA) du courrier. Celle des régions rurales se situe au niveau des codes postaux individuels. Une RTA se caractérise par les trois premiers caractères des codes postaux qui la constituent (c.-à-d. T5A). Dans une RTA, on retrouve donc plusieurs codes postaux différents. Ceux-ci sont classifiés selon le type de distribution du courrier qui leur est propre. Dans un grand centre urbain, le courrier peut être distribué soit:

- à une résidence spécifique,
- à une entreprise spécifique,
- à une route rurale en périphérie,
- à une case près d'une nouvelle banlieue (service de banlieue),
- à une case au bureau de poste,
- à la poste restante.

Les déclarations pour la RTA sont regroupées de deux différentes façons: RTA-1 et/ou RTA-2. Les déclarations dont le code postal de l'adresse de retour indique une **résidence** spécifique (p.e. T5A-1) sont regroupées ensemble. Tous les déclarants qui utilisent soit l'adresse d'une entreprise spécifique, une case au bureau de poste ou la poste restante ont été regroupés (p.e. T5A-2).

In some urban FSAs, there are postal codes representing rural routes and suburban service areas. These codes are shown separately and are not included in the specific FSA line, but are included in the FSA totals.

For non-residential mail delivery (i.e. FSA-2 postal codes, rural routes and suburban service postal codes), the postal code and therefore the FSA, relate to the location of the post office and not necessarily to the place of residence.

Table Contents

The data are presented in four sections:

- all taxfilers;
- taxfilers reporting any income;
- taxfilers reporting either employment income or income from unemployment insurance benefits;
- taxfilers reporting any employment income.

Demographic characteristics are given for all taxfilers. Some taxfilers have no income but file for other reasons, such as to claim a Child Tax Credit. For those taxfilers reporting some income, medians and a distribution by income are given. For taxfilers reporting employment income or unemployment insurance benefits (a "labour force" group), a number of demographic characteristics are shown. For taxfilers with employment income, medians by sex are given.

The first two pages of Table 1 provide summary data for Canada and the provinces. In addition, the first two lines of each page of Table 1 provide data for Canada and the respective province to facilitate comparisons.

Appendices

Appendix A is a list of the column numbers, with a description or definition provided for each. Because of limited space, the column headings are very brief. The column numbers have been provided to ease the search for their descriptions.

Dans certaines RTA urbaines, il existe des codes postaux représentant la route rurale et le service de banlieue. Ces codes sont inscrits séparément aux tableaux, mais ne sont pas compris dans la ligne de la RTA. Ils entrent cependant dans le calcul des totaux de la RTA correspondante.

Pour la livraison du courrier non-résidentiel (c.-à-d. codes postaux T5A-2, route rurale et codes postaux pour service de banlieue), le code postal ainsi que la RTA indiquent l'emplacement du bureau de poste mais pas nécessairement celui de la résidence.

Contenu des tableaux

Les données présentées aux tableaux se divisent essentiellement en quatre catégories:

- données correspondant à tous les déclarants;
- données représentant ceux qui ont déclaré un revenu quelconque;
- données représentant ceux qui ont déclaré un revenu d'emploi ou des prestations d'assurance-chômage;
- données représentant ceux qui ont déclaré un revenu d'emploi.

Les caractéristiques démographiques sont présentées pour tous les déclarants. Certains déclarants ne reçoivent aucun revenu mais préparent une déclaration d'impôt pour d'autres raisons, telles que pour réclamer le crédit d'impôt pour enfants. Pour les déclarants avec un revenu quelconque, les médianes ainsi qu'une répartition du revenu total sont présentées. Certains indicateurs démographiques sont présentés pour les personnes ayant déclaré un revenu d'emploi ou des prestations d'assurance-chômage; celles-ci formant en quelque sorte un groupe de la population active. La médiane du revenu d'emploi est indiquée pour les individus ayant déclaré un revenu d'emploi, selon le sexe.

Les deux premières pages du Tableau 1 présentent des données sommaires pour l'ensemble du Canada et pour chacune des provinces. De plus, les deux premières lignes de chacune des pages du Tableau 1 présentent des données pour le Canada et la province respective dans le but de faciliter les comparaisons.

Appendices

Les différentes variables inscrites aux tableaux sont définies à l'appendice A. En raison du peu d'espace, les en-têtes sont très brefs. À chacune d'elles correspond un nombre identifiant la colonne à laquelle on la retrouve.

Appendix B is a cross-reference list of postal codes. Because Table 1 is presented in alphabetic order of place name, with the FSA or postal code also shown, this list has been ordered by postal code, with the place name also appearing. To find a particular postal code or FSA in Table 1, it becomes possible, through the use of this list, to find the corresponding place name and thereby locate the appropriate line(s) of data in the table.

Confidentiality and Rounding

To preserve confidentiality of individuals, data are produced under the following restrictions:

1. There must be at least 100 taxfilers in a region (a region is represented by one line of data);
2. each cell must represent at least 25 taxfilers.

All counts have been rounded to the nearest 25 and all income values have been rounded to the nearest \$100.

Data Quality

The data represent direct counts from the tax files. No adjustments have been made to allow for under-coverage in the tax file, or to benchmark the data to other income estimates. Adjusted data for census divisions and subprovincial areas are available in Income estimates for subprovincial areas (Catalogue 13-216).

Approximately 60% of all Canadians file tax returns. This rate has remained relatively constant in recent years:

Year	Taxfilers ('000s)	Pop. ('000s)	%
1981	15,185	24,342	62.4
1982	15,224	24,632	61.8
1983	15,259	24,885	61.3
1984	15,241	25,124	60.7
1985	15,573	25,359	61.4

Persons not filing income tax returns include most children and many elderly (mainly those who receive only Old Age Security and Guaranteed Income Supplement).

L'appendice B sert à faciliter le lien entre un code postal et sa localité. Les localités sont inscrites au tableau 1 en ordre alphabétique; les RTA ou codes postaux qui leur correspondent y sont aussi indiqués. L'appendice B contient une liste ordonnée par codes postaux ainsi que la localité à laquelle chacun appartient, permettant d'associer un code postal à un endroit géographique plus facilement.

Confidentialité et arrondissement

Afin de respecter la confidentialité des particuliers, les données sont produites à partir des normes suivantes:

1. Il doit y avoir au moins 100 déclarants dans une région donnée (une région est représentée par une ligne de données);
2. chaque cellule doit représenter au moins 25 déclarants.

Tous les totaux ont été arrondis à un multiple de 25 et les revenus aux 100 dollars près.

Qualité des données

Les données sont directement agrégées à partir des fichiers d'impôt, sans ajustement à la population, ou étalonnage par rapport à d'autres agrégats de revenu. Des données ajustées au niveau des divisions de recensement et autres régions infraprovinciales sont disponibles dans la publication intitulée Estimations du revenu dans les secteurs infraprovinciaux (numéro 13-216 au catalogue).

Approximativement 60% de tous les Canadiens produisent une déclaration de revenus. Ce taux est demeuré relativement constant depuis quelques années:

Année	Nombre de déclarants ('000s)	Population ('000s)	%
1981	15,185	24,342	62.4
1982	15,224	24,632	61.8
1983	15,259	24,885	61.3
1984	15,241	25,124	60.7
1985	15,573	25,359	61.4

Parmi les personnes qui ne produisent pas de déclaration de revenus se trouvent la plupart des enfants ainsi que plusieurs des personnes âgées, principalement celles n'ayant pour seuls revenus que les pensions de vieillesse et le supplément de revenu garanti.

Age group	1980 Taxfilers ('000s)	1981 Pop. ('000s)	%
<18	291	6,845	4.2
18-24	2,824	3,295	85.7
25-44	6,511	7,184	90.6
45-64	3,641	4,658	78.2
>64	1,259	2,301	53.5

Values are imputed when missing for age (0.2% of taxfilers), sex (0.2% of taxfilers) and marital status (5.9% of taxfilers).

The proportion of the labour force covered is high. In 1985, 12,650,000 taxfilers reported employment income and/or receipt of unemployment insurance benefits. The monthly Labour Force Survey reported an annual average labour force of 12,639,000, less than 1% lower.

All income data are unadjusted. Because persons with low income have no tax liability and therefore many do not file tax returns, income measures such as medians have an upward bias, as illustrated in a comparison to the Statistics Canada annual Survey of Consumer Finances (SCF) in 1985:

Tax median income	\$15,400
SCF median income	\$13,584
Difference	13%

Householder Counts and Maps

The publications "Householder Figures for Letter Carrier Offices" and "Householder Figures for Non Letter Carrier Offices" are available through your local post office in hard copy form. If these data are required on magnetic tape, please contact:

Householder Data Section
Canada Post Corporation
Ottawa, Ontario
K1A 0B1
Tel.: (613) 957-8014

FSA maps are included in the publications of householder counts mentioned above. Larger scale maps are available from:

Postal Code Management
Canada Post Corporation
Ottawa, Ontario
K1A 0B1
Tel.: (613) 957-8009

Groupe d'âge	Nombre de déclarants 1980 ('000s)	Population 1981 ('000s)	%
<18	291	6,845	4.2
18-24	2,824	3,295	85.7
25-44	6,511	7,184	90.6
45-64	3,641	4,658	78.2
>64	1,259	2,301	53.5

Les valeurs manquantes pour des variables telles que l'âge (pour 0.2% des déclarants), le sexe (pour 0.2% des déclarants) et l'état matrimonial (pour 5.9% des déclarants) ont été imputées.

Le rapport population active / déclarants avec revenu d'emploi ou prestations d'assurance-chômage est élevé. En 1985 on compte 12,650,000 déclarants avec de tels revenus, alors que l'Enquête sur la population active dénombre la population active à une moyenne annuelle de 12,639,000, soit une différence d'approximativement 1%.

Les données sur le revenu n'ont subi aucun ajustement. Puisque les personnes à faibles revenus ne sont pas assujetties à l'impôt et ne produisent donc pas de déclarations de revenus, les indicateurs de revenus sont biaisés positivement. L'Enquête annuelle de Statistique Canada sur les finances des consommateurs (EFC) de 1985 démontre ce fait:

revenu médian, impôt	\$15,400
revenu médian, EFC	\$13,584
différence en pourcentage	13%

Nombres de chefs de ménage et cartes

Les publications "Nombre de chefs de ménage pour les bureaux avec facteurs" et "Nombre de chefs de ménage pour les bureaux sans facteurs" sont disponibles à votre bureau de poste local sous forme d'imprimés. Si vous désirez ces données sur ruban magnétique, prière de contacter:

Section des données sur les
répertoires d'adresses
Société canadienne des postes
Ottawa (Ontario)
K1A 0B1
Tél.: (613) 957-8014

Des cartes par RTA sont incluses dans les publications ci-haut mentionnées. Des cartes à plus grandes échelles peuvent être obtenues de:

Gestion des codes postaux
Société canadienne des postes
Ottawa (Ontario)
K1A 0B1
Tél.: (613) 957-8009

Additional Data

This is the second time data of this type have been published. The data for the 1984 tax year appeared in publication No. 17-602 (Issues Nos. 86-001, 86-002, 86-003, 86-004).

Both sets of data are available in machine-readable form.

In addition, more detailed data by postal code are available from the Small Area and Administrative Data Division.

Diane Dubé
Nelson Kopustas
Linda Standish
Michele Vigder

Données additionnelles

C'est la deuxième fois que des données de ce genre sont publiées. Les données pour l'année fiscale 1984 ont paru sous la publication no. 17-602 (Éditions nos. 86-001, 86-002, 86-003, 86-004).

Ces deux ensembles de données sont disponibles sur supports magnétiques.

De plus, des données plus détaillées, selon le code postal, sont disponibles de la Division des données régionales et administratives.

APPENDIX A

Description of Column Headings

The column description in Table 1 is very brief so this appendix has been organized to facilitate identification of the description and definition of each variable by its respective column number appearing in the table.

The four categories refer to the corresponding sections in the table:

- all taxfilers;
- taxfilers reporting any income;
- taxfilers reporting employment income and/or unemployment insurance benefits;
- taxfilers reporting any employment income.

Column:

1 Area

The name is that of either a rural or urban post office. If it is a rural post office, only one line of data appears. If it is an urban area perhaps several lines of data are shown. Each line will be for one of five types:

1. An FSA followed by "-1" (e.g. T1A-1) - The Forward Sortation Area is the first three positions of the postal code. This line includes data corresponding to postal codes representing residential addresses.
2. An FSA followed by "-2" (e.g. T1A-2) - This line includes data corresponding to taxfilers using business addresses, post office boxes, or general delivery. These taxfilers may or may not live within the boundary of the FSA.
3. A postal code followed by "RR" (e.g. T1A1R5-RR). This is a rural route served from an urban area. The people served by this rural route may not live within the boundary of the FSA.
4. A postal code followed by "SS" (e.g. T1A2T6-SS). This is a suburban service area served by this post office. The people served by this suburban service may not live within the boundary of the FSA.
5. A "TOTAL" line gives data for all the entries within the same post office name (usually an urban area). Because of rounding, the aggregates on this line may not be the sum of the individual components included in its calculation.

All Taxfilers

2 Number

The number of individuals who filed a personal income tax return in 1985.

3 Percent Change 1980-1985

The percent change in the number of taxfilers from 1980 to 1985.

4 Percent Female

The percentage of 1985 taxfilers who are female.

5 Percent Married

The percentage of taxfilers who reported themselves as married on December 31, 1985.

6 to 9 Percentage by Age

Percentage of 1985 taxfilers in the given age group:

<u>Column</u>	<u>Age Group</u>
6	<25
7	25-44
8	45-64
9	>64

10 Percentage in Apartment

The percentage of 1985 taxfilers who filed from multiple-unit dwellings with more than 50 units.

Taxfilers Reporting Income

In 1985, for all of Canada, 96% of all taxfilers reported some income. Columns 11 through 23 include data for this group.

Total income includes employment income, pension income, self-employment income (i.e. net business income, net professional income, net farming income, net fishing income, net commission income) and income from other sources (i.e. Family Allowance benefits, Unemployment Insurance benefits, interest and other investment income, rental income, capital gains).

11 Number

The number of taxfilers reporting some income in 1985.

12 to 17 Percentage With Income Greater Than

Of those taxfilers who reported income, this is the percentage who reported income greater than the specified limits:

<u>Column</u>	<u>Limit</u>
12	\$15,000
13	\$25,000
14	\$35,000
15	\$50,000
16	\$75,000
17	\$100,000

18 to 20 Median Total Income

Median total incomes, rounded to the nearest one hundred dollars. Half of the people who reported any income reported an income less than or equal to the median income. The medians are reported for each sex and both sexes combined:

<u>Column</u>	<u>Sex</u>
18	Male
19	Female
20	Both Sexes

21 Canadian Index

The 1985 median total income for both sexes (column 20) for the postal code area is compared to the Canadian median and expressed as an index (Canadian median \$15,400 = 100). An index of 120 indicates that the median total income for an area is 20% higher than the Canadian median.

22 Provincial Index

The 1985 median total income for both sexes (column 20) for the postal code area is compared to the respective Provincial median and expressed as an index. An index of 80 indicates that the median total income for the area is 20% lower than the Provincial median.

23 Percent Change 1980-1985

This is the percent change in median total income between 1980 and 1985.

Taxfilers Reporting Employment Income and/or U.I.

The data presented in the following columns apply only to those taxfilers who reported either employment income or income from unemployment insurance benefits, or both. In 1985 for all of Canada, 81% of all taxfilers reported at least one of these sources of income.

Employment income includes wages and salaries, T4 Commissions, training allowances, tips and gratuities, and all income from self-employment as described for columns 11 through 23.

24 Number

The number of 1985 taxfilers who reported either or both of employment income or income from unemployment insurance benefits.

25 Percent Female

The percentage of taxfilers included in column 24 who are women.

26 Percentage reporting Unemployment Insurance

The percentage of taxfilers included in column 24 who reported receipt of unemployment insurance benefits.

27 Canadian Unemployment Insurance Rank

The % U.I. (column 26) for the postal code area is ranked with the % U.I. for other postal code areas throughout Canada. If an area has a rank of 526, there are 526 postal code areas in Canada with a % U.I. less than or equal to the % U.I. for this area. The number of areas ranked (and therefore the maximum rank) is provided in the line of data for Canada. To convert the rank to a percentile, divide the area rank by this maximum rank and multiply by 100.

28 Provincial Unemployment Insurance Rank

The % U.I. (column 26) for the postal code area is ranked with the % U.I. for other postal code areas throughout the respective province. If an area has a rank of 127, there are 127 postal code areas in the province with a % U.I. less than or equal to the % U.I. for this area. The number of areas ranked (and therefore the maximum rank) is provided in the line of data for the province. To convert the rank to a percentile, divide the area rank by this maximum rank and multiply by 100.

Taxfilers Reporting Any Employment Income

The data in the next three columns apply only to those taxfilers who reported employment income. Employment income includes wages and salaries, T4 commissions, and all income from self-employment as described for Columns 11 through 23. Half of the taxfilers who fall in this category reported an employment income less than or equal to the median.

29 to 31 Median Employment Income

The medians, rounded to hundreds of dollars, are given for each sex and for both sexes combined:

<u>Column</u>	<u>Sex</u>
29	Male
30	Female
31	Both sexes

32 Area

See column 1.

APPENDICE A

Description des en-têtes des colonnes

Les variables inscrites au tableau 1 sont définies brièvement dans ce qui suit. A chacune d'elles correspond un nombre identifiant la colonne dans laquelle on la retrouve. Une variable se retrouve parfois chez plus d'un groupe de déclarants. Les données sont regroupées en quatre grandes catégories, chaque catégorie correspondant à un regroupement des déclarants:

- tous les déclarants;
- tous les déclarants ayant indiqué un revenu quelconque
- tous les déclarants ayant indiqué un revenu d'emploi et/ou de prestations d'assurance-chômage;
- tous ceux qui ont déclaré un revenu d'emploi.

Colonne:

1 Région

Le nom dans la colonne Région correspond au nom du bureau de poste (rural ou urbain) de la localité. Dans le cas d'un bureau de poste rural, seulement une rangée de données est inscrite au tableau; pour une région urbaine, plusieurs rangées de données peuvent apparaître. Chaque rangée de données correspond à l'une des cinq classes de régions géographiques:

1. La RTA suivie de "-1" (p.e. T1A-1) - consiste en une région définie par des codes postaux dont les trois premiers caractères sont les mêmes (région de tri d'acheminement). Cette ligne comprend des données correspondant aux différents codes postaux représentant l'adresse résidentielle.
2. La RTA suivie de "-2" (p.e. T1A-2) - consiste en une région regroupant les déclarants qui utilisent une adresse d'entreprise, une case au bureau de poste ou encore, la poste restante.
3. Code postal suivi de "RR" (p.e. T1A1R5-RR) - ce code postal désigne une route rurale desservie à partir de cette localité urbaine. Les déclarants ayant un tel code postal de retour peuvent ne pas demeurer dans la RTA définie par ses trois premiers caractères.
4. Code postal suivi de "SS" (p.e. T1A2T6-SS) - ce code postal désigne une région à service de banlieue de distribution du courrier desservie par un bureau de poste. Ici encore, les individus ayant un tel code postal de retour peuvent ne pas demeurer à l'intérieur des limites de la RTA définie par ses trois premiers caractères.
5. TOTAL: pour les régions urbaines constituées de plus d'une sous-région, et ayant donc plus d'une rangée de données, les totaux des variables sont indiqués. Suite à l'arrondissement, le total peut ne pas correspondre à la somme des valeurs individuelles.

Tous les déclarants

2 Nombre

Cette variable indique le nombre total de particuliers qui ont préparé une déclaration d'impôt pour l'année civile 1985.

3 Changement en pourcentage, 1980-1985

Le changement en pourcentage du nombre total de déclarants de 1980 à 1985 est indiqué dans cette colonne.

4 Proportion des déclarants de sexe féminin

Cette colonne indique le pourcentage des effectifs féminins par rapport au nombre total de déclarants.

5 Proportion des déclarants mariés

Cette variable montre le pourcentage des déclarants qui se sont indiqués mariés en date du 31 décembre 1985.

6 à 9 Répartition selon le groupe d'âge

Ces colonnes indiquent le pourcentage du nombre total de déclarants qui, en date du 31 décembre 1985, appartenaient aux groupes d'âge suivants:

<u>Colonne</u>	<u>Groupe d'âge</u>
6	<25
7	25-44
8	45-64
9	>64

10 Proportion en appartement

Cette variable indique le pourcentage du nombre total de déclarants qui demeurent dans des édifices à logements de plus de 50 unités.

Déclarants avec un revenu quelconque

En 1985, 96% des déclarants canadiens ont indiqué un revenu quelconque. Les colonnes 11 à 23 présentent des données pour ce groupe.

Le revenu total comprend le revenu d'emploi, le revenu de pension, le revenu d'emploi autonome (c.-à-d. revenu net provenant d'un commerce, revenu professionnel, agricole, de la pêche ou encore revenu net sous forme de commissions) et revenus en provenance d'autres sources (c.-à-d. allocations familiales, prestations d'assurance-chômage, intérêts et autres revenus d'investissement, revenus nets de location et gains en capital).

11 Nombre

Cette colonne indique le nombre de déclarants qui ont indiqué un revenu quelconque pour 1985.

12 à 17 Proportion des revenus plus élevés que

Ces variables indiquent, dans l'ordre, les pourcentages de déclarants avec revenus plus élevés que:

<u>Colonne</u>	<u>Limite</u>
12	\$15,000
13	\$25,000
14	\$35,000
15	\$50,000
16	\$75,000
17	\$100,000

18 à 20 Revenu total médian

Ces colonnes indiquent les médianes du revenu total arrondies aux 100 dollars près. La moitié des déclarants avec un revenu quelconque ont indiqué un revenu moindre ou égal au revenu médian. Les médianes sont présentées pour chacun des sexes et pour les deux sexes.

<u>Colonne</u>	<u>Sexe</u>
18	Femmes
19	Hommes
20	Les deux sexes

21 Indice en rapport à la médiane canadienne

Cet indice situe le revenu total médian des deux sexes (colonne 20) pour la région par rapport à la médiane correspondante pour le Canada. En 1985, le revenu total médian canadien pour les deux sexes est de 15,400 dollars (Indice = 100). Par exemple, un indice de 120 indique que le revenu médian total pour la région est de 20% supérieur à la médiane canadienne.

22 Indice en rapport à la médiane provinciale

Le revenu total médian de 1985, pour les deux sexes (colonne 20), selon la région définie à partir du code postal est utilisé à titre de comparaison avec la médiane provinciale et identifié comme "indice". Un indice de 80 indique un revenu total médian pour une région spécifique de 20% inférieur à la médiane provinciale.

23 Changement en pourcentage du revenu médian, 1980-1985

Cette colonne indique le changement en pourcentage du revenu total médian des deux sexes de 1980 à 1985.

Déclarants avec un revenu d'emploi et/ou de prestations d'assurance-chômage

Les données présentées aux colonnes suivantes s'appliquent aux déclarants qui ont indiqué soit un revenu d'emploi, soit des prestations d'assurance-chômage, soit les deux. En 1985, ces déclarants comprennent 81% de tous les déclarants canadiens.

Le revenu d'emploi comprend les traitements et salaires, les commissions T4, allocations de formation, pourboires et gratifications, ainsi que tout revenu provenant d'emploi autonome tel que décrit aux colonnes 11 à 23 inclusivement.

24 Nombre

Cette colonne indique le nombre de déclarants qui ont indiqué un revenu d'emploi et/ou des prestations d'assurance-chômage pour 1985.

25 Proportion de sexe féminin

Cette variable indique le pourcentage des effectifs féminins parmi les effectifs indiqués à la colonne 24.

26 Proportion des prestataires d'assurance-chômage

Cette variable montre le pourcentage d'individus qui, parmi ceux inscrits à la colonne 24, ont déclaré des prestations d'assurance-chômage pour 1985.

27 Le rang de l'assurance-chômage canadien

Le pourcentage de l'A.-C. (colonne 26) pour la région définie selon le code postal est comparé avec le pourcentage de l'A.-C. pour les différents codes postaux à travers le Canada. Si une région a un rang de 526, cela nous indique l'existence de 526 régions à codes postaux au Canada avec un pourcentage d'A.-C. inférieur ou égal au pourcentage de la région concernée. Le nombre des régions comparées selon le rang (ainsi que le rang maximum) vous est donné à la ligne de données pour le Canada. Afin d'obtenir la conversion d'un pourcentage à un centile, divisez le rang de la région souhaitée par le rang maximum et ensuite multipliez par 100.

28 Le rang de l'assurance-chômage provincial

Le pourcentage de l'A.-C. (colonne 26) pour la région définie selon le code postal est comparé avec le pourcentage de l'A.-C. pour les différents codes postaux à travers la province concernée. Si une région a un rang de 127, cela nous indique l'existence de 127 régions à codes postaux dans la province avec un pourcentage d'A.-C. inférieur ou égal au pourcentage de la région concernée. Le nombre de régions comparées selon le rang (ainsi que le rang maximum) vous est donné à la ligne de données pour la province. Afin d'obtenir la conversion d'un pourcentage à un centile, divisez le rang de la région souhaitée par le rang maximum et ensuite multipliez par 100.

Déclarants avec un revenu d'emploi

Les données présentées dans les trois colonnes suivantes s'appliquent aux déclarants qui ont indiqué un revenu d'emploi. Le revenu d'emploi comprend les traitements et salaires, les commissions T4, ainsi que tout revenu provenant d'emploi autonome tel que décrit aux colonnes 11 à 23 inclusivement. La moitié des déclarants représentés dans cette catégorie ont indiqué un revenu d'emploi inférieur ou égal à la médiane.

29 à 31 Revenu d'emploi médian

Ces colonnes indiquent les médianes du revenu d'emploi, arrondies aux 100 dollars près. Les médianes sont présentées pour chacun des sexes et pour les deux sexes.

<u>Colonne</u>	<u>Sexe</u>
29	Hommes
30	Femmes
31	Les deux sexes

32 Région

Voir colonne 1.
